United Nations Specialized History Agencies for Class - X by Sudeshna SenguptaBook Summary: A textbook is considered effective if it is perfectly useful for teachers and students alike. With this in mind, I designed ICSE History & Civics 10 slightly differently. Each chapter is interspersed with sections devoted to allow students to review small sections before attempting to understand the whole chapter. It is important to note that the review section was designed along the lines of the objective questions set by the Board for University Examinations of the Indian School, New Delhi. Each chapter has a To Remember section, which recapitulates the entire chapter. The questions raised by the Council have been put at the end of each chapter. This will be convenient for both teachers and students, as it would eliminate the need to look elsewhere for relevant Board questions. The Photo Study section meets the Council's requirement for "Photo Problems." The timeline at the end of the chapters in the History section will help students remember important dates and events. Book Audience: This book is useful for class X students.Table of Contents: Section A: Civic 1. Union legislation 2. The President and Vice-President 3.
