For example, let's look at the first line of Jane Austen's novel, pride and prejudice: "It's a universally recognized truth than a man in possession of a good fortune, must be in the absence of a wife." Now, a completely literal interpretation of the text, only based on the word-sense, wants us to believe that 'all rich men want wives.' But the context, choosing words and phrases of the text, in fact, to misunderstand this interpretation. By using the "universally recognized" phrases and "it must be in the absence of" (our griffin), the text is transmitting a subtle sarcasm to the words. In addition to being a real truth that 'rich men want wives,' this one phrase instantly tells us that we are reading about a society worried about marriage at the same time, which implies that the opening statement It is something that people in which society can believe, but that it is not necessarily true. In a nutshell, Austen conveys various ideas to the reader about one of the main themes of the story, the scenario, and what the culture and people are like. And she does it all the time seeming to contradict the literal words of the piece. Without practicing in the understanding of reading, nuances like these can get lost. And so, it may happen that someone can find herself read, but do not truly understand the full meaning of a text.
