At the end of a timebox – or sprint - the entire Scrum Team is accountable for creating a valuable, useful increment. Regular interactions with stakeholders, small batches of work, regular reviews and retrospectives improve the process and therefore, the product. Read about 5 whys root cause analysis in agile teams, along with its approaches and success factors, in our blog posts. What is SAFe? As mentioned above, Agile was designed for small teams and SAFe® was designed to scale to various levels, from essential to full SAFe®. It rests on the Agile Foundation and expands on it. Cprime recently published a report called Agile at Scale 2020. The report was based on a survey of companies who are scaling Agile beyond small teams and often to the enterprise. The size of development teams ranged from
