Source: iMore Adobe launched today some new updates for its Lightroom application set, with Mac, iPhone, and iPad all getting some love. Adobe says that updates are based on customer feedback as well as requests for new features. As part of these new updates, the Lightroom for Mac gains support for DNG export, bringing parity characteristics with the iPhone. Previously, Mac users could only export in TIFF or JPEG format. The Mac version too © m has now improvements in shared lbums, and users are given the option of including or omitting metadata when adding photographs to these albums. The Lightroom for iPad now supports split screen, allowing two applications to work side by side for the first time. Adobe uses an example of Lightroom on one panel and Safari on another, but if it is someone else © working on a major project, can have a reference item available next to Lightroom. Both the iPhone and the iPad have now redesigned the Learning and Discovering sections, with a new view in two columns available. You can read all about what Adobe has changed in this round of updates, as well as get an idea of what is foreseen for the rest of 2020 on the company blog.
