The following code shows the configuration of the provider's model for react-redux: import react from "react" Import Reactdom from "react-dom" import {provider} from "react-redux" import store from "./store" import app from './App' const rootelement = document.getElementById ('root') React} ({ class HOC extends Component { render() { return ; } } return HOC; }; The provider pattern The provider pattern in React is an advanced pattern used to share global data across multiple components in the React component tree. Design patterns are great because they enable us to leverage the experience and expertise of all the developers who created and reviewed these patterns. Finally, update the App.js with the following code: import React from "react"; import Accordion from "./components/Accordion"; import faqData from "./data"; export default function App() { return (LogRocket FAQ {faqData.map((item) => (
