Vampire Lord after the Dawnguard quest was finished but when I transformed I tried to revert back but I couldn't what do I have to do to revert back to Human form, and I have to ask you if you are Human if you have a Dawnguard add-on will the citizens of a Hold attack you, and can they sense you as a Vampire because I was reading that the Vampire Lord has stages like the normal Vampirism disease. So This May Sound Stupid bit I Don't even Know How I got transformed.. How does one transform back if I'm Using the Xbox One Try pressing up or down on the D-Pad, then selecting 'Revert Form' on the menu that shows up, then use your shout/power button (Normally RB) (edited by A Fandom user)Garry Damrau wrote:I think that it might be helpful to explain that to access the Vampire Lord abilities menu, you must press the UP or DOWN button on the D-pad, this is what you have to do on console (edited by A Fandom user)To go from vampire to human, hit down on the D-pad and select Revert Form, then hit RB1. If you've gotten past this point, then ask Harkon or Serana to infect you and they shall. If you're looking for how to transform into the form itself: Vampire Lord form should be available under the "Powers" tab on the menu. After setting it, hit the same button that you would to use other powers/shout and you will transform after hearing a special sound cue. (edited by Ottoman Hold)I've had the same problem. I'm on PC, what the other comments are saying is true. You need to open your favorites bar. If it's nots working, then the game might've done a weird default for the key. Just press the Esc key, then click Controls, scroll down till you find "Favorites" and you'll see what key it is. You can change it by clicking and pressing another button, like Q. After that just continue your game and it should work. Hope this helps.
