

I'm human

How to Become Powerful Arrancar in Peroxide may contain outdated information, but it provides valuable insights into the popular Roblox game Peroxide. The game features various titles based on popular franchises like One Piece and Naruto, along with unique games like Peroxide. In Peroxide, you can join one of three factions, which greatly impact your character's abilities and gameplay. To become a powerful Arrancar in Peroxide, you'll need to progress through the game's Hollow system. Each player starts as a human but must die before choosing a faction. You can achieve this by walking around until other players kill you, then press G to break the chain and become Hollow. Your goal is to hunt other Hollows, which will continue until level 20 when you get red eyes. Red eyes indicate your strength, but if you die, you'll need to wait 30 minutes or kill another red-eyed Hollow to regain them. You'll eventually become Gillian (Menos) and then Adjuchas by killing a set number of Hollows and surviving for 30 minutes. To reach the final form, Vasto Lorde, you'll need to accumulate 1.7k Hollow kills. Throughout your journey, you can check your progress with Shady Arrancar. You can also rip off your Hollow mask (not recommended until reaching Adjuchas) to gain more power: Gillian (Menoscar), Adjuchas (Adjucar), and Vasto Lorde (Vastocar). However, even Vastocar is not the final form of the Hollow in Peroxide. To achieve ultimate power, you'll need to reach level 90, earn 420 "Points" by defeating bosses and completing the Time gate, and check your progress with Hueco Oscura. Then, you must go to Menos Forest, find a ruined building, and enter the hole to fight the Hollow Prince. After defeating the prince, you'll receive Segunda Etapa, allowing you to reach new heights of power in Peroxide. Looking forward to seeing everyone at the meeting tomorrow and discussing our strategies. While playing this faction, one thing is clear: becoming a Hollow is worth it, especially when it comes to unlocking power and progression in Hueco Mundo. To start, you need to become a spirit by dying first, then pulling out your chain of fate five times by pressing 'G' repeatedly or using the avatar button on mobile devices. After becoming a regular Hollow, teleport to Hueco Mundo to hunt other Hollows, which will increase your strength and set you up for advancement. The next step is to hunt and defeat Hollows with red eyes to gain levels and unlock new abilities. To reach Level 20, keep attacking and eating the remains of defeated Hollows until then. Once at this level, look for Hollows with red eyes and defeat one to get red eyes yourself. Defeating another red-eyed Hollow will evolve you into the Menos stage. As a Menos, you have the option to become an Arrancar by pressing 'G'. However, be aware that this choice can be detrimental, as your strength increases but potential is extremely low. It's recommended to only become an Arrancas Lorde, and to avoid pressing 'G' unless absolutely necessary. The state of being a Menos offers immense power, but also comes with reduced speed and increased vulnerability when dying. To progress further as a Menos, you need to take out 30 Hollows in battle while staying alive for 30 minutes. This can be challenging due to reduced speed and heightened visibility, making it easier for NPCs and players to target you. However, if you stay safe, you'll automatically advance to the next stage upon fulfilling these conditions. Yet again, you need to compress your form into a smaller but quicker and more powerful hollow, known as Adjuchas. To reach the level of Vasto Lorde, which costs 1700 Points, you'll have to defeat Hollows and Arrancar. Here's how to rack up points: - Normal Hollow: 1 point - Eating A Hollow Body: 1 point - Red-Eyed Hollow: 3 points - Menos Grande: 5 points - Ancient Menos Grande: 15 points (can be identified by their different masks) - Adjuchas: 10 points - Ancient Adjuchas: 25 points - Vasto Lorde: 50 points - Ancient Vasto Lorde: 75 points - Storm Arrancar: 100 points (extremely difficult and requires at least 55% damage to be rewarded) To gain points quickly, you can use the Impure Hogyoku method. If you see yellow energy lines (limitbreak effect) going into your target after a kill, it means you've received the credit for that kill. You can check your progress with Shady Arrancar in The Alley or the one in Karakura. To become a Vastolorde, you need to cycle through servers from the cave (1 Vasto Lorde) to the gorge (2 Vasto Lorde) in Hueco Mundo, starting around level 75. Alternatively, you can get decently high levels and deal damage to Storm Arrancars with friends' help. To become a Hollow in Peroxide, the first step is to die as a human and transform into a Soul. You can easily find another player to kill yourself with or accept your fate in-game. Once you're a Soul, press G to initiate the Soul Chain removal process - it might take a few attempts (it took me about five tries). As your Soul Chain is extracted, a black aura will surround you, and you'll transform into a Hollow. To become a Red Eye Hollow, level up to 20 by killing other Hollows in Hueco Mundo. You can fast travel there by pressing 1 or the button below your health bar. Killing normal Hollows earns you kills toward your Vasto Lorde progression. However, losing your red eyes means you'll either need to kill another Red Eye Hollow and steal their eyes (after leveling back up) or wait 30 minutes for them to return automatically. To become a Gillian (also known as Menos Grande), kill a Red Eye Hollow while already being a Red Eye Hollow - this doesn't count if you're trying to regain your red eyes. Note that dying as a Red Eye will reset all your levels, requiring another level-up to 20. As a Gillian, you can choose between becoming The Menoscar or Adjuchas. To become a Menoscar, remove your mask by pressing G (though it's advised not to do this, as the Menoscar is relatively weak). To become an Adjuchas, kill 30 Hollows and survive for 30 minutes as a Gillian/Menos - this timer starts immediately after becoming a Gillian. If you choose to, you can remove your mask as an Adjuchas and become an Adjucar, offering significant stat boosts. Lastly, becoming a Vasto Lorde requires killing 1700 Hollows across your Hollow progression journey (not necessarily all at once). Each Hollow killed contributes differently toward your progress - for example, killing a Red Eye earns three kills, while killing a Vasto Lorde earns 50. When you die for the first time, regardless of which Hollow class you were, you will lose 60 kills. However, there's good news: once you reach a kill count of 1250, your progress will plateau at that number, and you won't go below it even if you die again. Here's a breakdown of how many kills each Hollow transformation is worth towards your Vasto Lorde progress: * Normal Hollow: 1 kill * Red Eye Hollow: 3 kills * Gillian: 5 kills * Ancient Gillian: 12 kills * Adjuchas: 10 kills * Ancient Adjuchas: 25 kills * Vasto Lorde: 50 kills * Ancient Vasto Lorde: 75 kills * Storm Arrancars: 100 kills You can check your progress by talking to the Shady Arrancar in Karakura, who will give you specific phrases based on how many kills you've made. For example, if you have between 0-100 kills, he'll say "Not a single bit of progress." To find the Shady Arrancar, look for him in an alleyway near the Café. Follow the path from Karakura and you'll see him there. Once you become a Vasto Lorde, removing your mask will make you the strongest arrancar, known as The Vastocar. You'll get a 1.15x stat multiplier, 80% EXP boost, and increased HP and level cap. However, your journey doesn't end here - to unlock your Segunda Etapa in Peroxide, you need to follow the next steps.
