PMID: 33010859 The document is an executive summary of the ACC/AHA 2008 guidelines focused on the management of adults with congenital heart disease. It outlines the collaborative efforts between the American College of Cardiology Foundation and the American Heart Association in creating evidence-based recommendations. The guidelines emphasize the consideration of patient-specific factors, the importance of avoiding conflicts of interest in guideline development, and the aim of improving patient care through a consensus approach informed by an extensive literature review.
