

I'm not a bot

A group of people sent by a country to live in Massachusetts, such as a former British colony, is also known as a group of plants or animals living or growing in one place. The land or buildings used by this group are often referred to as a body of persons who form a fixed settlement in another country. This wiki contains full plot details for the TV show Colony, which was based on a concept created by Carlton Cuse and Ryan Condal. The series aired from 2016 to 2018 and explored themes of occupation, resistance, and survival in a dystopian near-future Los Angeles. The show's first season introduced viewers to Will Bowman (Josh Holloway), a former Army Ranger who finds himself at the center of a rebellion against an oppressive government. As the series progressed, new characters were introduced, including Kate Warner (Sarah Wayne Callies) and Will's family, who became embroiled in the conflict. Throughout its three seasons, Colony tackled complex issues such as identity, community, and the human cost of war. The show received widespread critical acclaim for its writing, acting, and direction, and has become a cult classic among fans of science fiction and drama.
